

Fairfield County News.

Due to Motor Car.

In a collision of vehicles near Norton Hill, Theodore R. Hoyt of Norton Hill and John Hackett of Stamford, were painfully hurt Sunday forenoon, and Sherman Blake, Mr. Hoyt's coachman, was severely shaken up. A couple of motor cars crowded Mr. Hackett's business wagon and frightened the horse he drove. Mr. Hoyt's light runabout was somewhat ahead of him. The horse, however, Mr. Hackett's control and ran away. It smashed into the Hoyt vehicle, and the three men were thrown out. Both vehicles were damaged. The horses ran, but were caught quickly. Mr. Hackett went to the hospital in the ambulance. There is likelihood that he is hurt internally. Mr. Hoyt's injuries are bruises and cuts and are not serious.

Fire in Weston.

Milburn's steam saw mill, at work for Charles R. Morehouse in Weston, caught fire from the boiler, during the heavy wind of Wednesday and was entirely destroyed. The fireman found the mill in ruins on going to work in the morning.

Sherman-Bennett.

Announcement has just been made of the marriage of Miss Mildred Bennett, of East Norwalk, and Wilbur H. Sherman, of Winsted. The ceremony was solemnized at New York, on October 21.

Killed by Live Wire.

The heavily charged overhead wire that the New Haven railroad uses in its electric zone claimed another victim Saturday. Arthur Dillon, a freight brakeman, was killed almost instantly. It is supposed that he came in contact with a live wire while standing on the top of the caboose of his freight train. The train was at a standstill at the time, somewhat east of the railroad station at Greenfield. Dillon had been putting a pane of glass in a window on the top of the caboose. Apparently he arose from a cramped position and possibly stretched himself. At all events, the top of his head came in contact with a live wire.

The Woman's Home.

The L. & M. Paint decorates more than two million American homes. Its beautiful finish and lasting freshness distinguishes a residence painted with it from all others. It's Metal Zinc Oxide combined with White Lead which makes it wear and cover like gold. Every 4 gallons of the L. & M. Paint, when mixed with 3 gallons of Linseed Oil at 65 cents per gallon, makes 7 gallons ready for use. Actual cost about \$1.20 per gallon. Sold by HARRY RIDER, Broker, 20 Northrop Bros., Southport; D. N. Clark, Shelton; T. P. Terry & Son, Ansonia; M. T. Gregory & Son, Milford.

NEWEST NOTES OF SCIENCE

For the storage of torpedoes the French Government has constructed and sunk in the Mediterranean near Toulon an artificial island of concrete and steel.

The first attempt to ship Swedish iron ore to the United States for smelting was made recently when a ship loaded with 5,000 tons sailed for Philadelphia.

A fish, found for the first time recently in Bahama waters, possesses much of its life within the shell of a large mollusc without apparently disturbing the latter.

The American record for rock tunneling was broken when 475 feet of the Los Angeles-Owens river aqueduct, nine by eleven feet, was bored through solid rock in March.

Naturalists have identified 117 species of frogs, some of which are native in every part of the world except New Zealand and the southern portion of South America.

A Canadian Government expert has estimated that there are over 20,000,000 tons of marketable fuel in the Crow's Nest Pass coal field of Alberta and British Columbia.

A German scientist claims to have discovered the germ of trachoma in the eyes of apes and to have demonstrated that the disease is contagious only in its first stages.

About 100,000 tons of tin plate scrap, including used cans, are detained in Europe each year, and about 60,000 tons in the United States, for the recovery of the tin and iron.

That fish may carry typhoid and cholera germs, and contaminated streams into hitherto unpolluted tributaries has been proven by experiments by the French Biological Society.

A Government physician at Manila has succeeded in cultivating the leprosy bacillus and will experiment further with a view to establishing a specific treatment for the disease.

Japanese waterproof paper is made from bamboo and eucalyptus, mixed with fibres of the cotton and other shrubs and treated with a solution containing camphor, caoutchouc and resin.

The diamonds produced by the recently discovered field in German Southwest Africa are of the first quality, but almost uniformly low in weight, averaging one-third of a carat each.

It is proposed to erect a monument to the public description in honor of Marey, the Frenchman, who is termed "the father of the moving picture," because of his inventions along that line.

The Adelskold gold medal, awarded but once every ten years, has been given by the Swedish Royal Academy to Thomas A. Edison for his inventions in connection with the phonograph and electric light.

Vine growers in southeastern France claim to have prevented enormous losses to their vineyards by hail storms by firing into the clouds explosive rockets to prevent the formation of icy particles.

An expert's studies of earthquakes in the United States, India and Japan for more than 20 years show that they almost always draw the banks of rivers nearer together and open fissures parallel with them.

German scientists expect to get 600 horsepower-hour of work from a ton of peat which will be taken from immense bogs in that country and converted into gas, together with much ammonia as a by-product.

A wealthy lumberman has offered the University of Minnesota a 2,200 acre tract for experimental purposes by its School of Forestry, and on the purchase of about \$5,000 worth of other land now held by Indians.

Experiments by the Aeronautical Society of Great Britain showed that a horizontal thrust of 200 to 27 pounds per horsepower can be obtained with flapping wings, about six pounds more than with the best airship propeller yet devised.

After a series of experiments relative to the effects of tin taken into the human system, a Scotch physician has announced that canned goods containing two or more grains of the metal to the pound are potentially deleterious to the health.

Although the Heracles coal fields extend along the shore of the Black Sea 40 miles and extend 200 miles inland, the coal contains so many impurities that mining is unprofitable except at one point, from which only 600,000 tons a year are taken.

Hudson Maxim, the expert on explosives, recently declared that the dropping of dynamite from airships upon fortifications, vessels or buildings would not necessarily be effective, as the powerful stuff must be confined to do its deadliest work.

Poley's Honey and Tar is a safeguard against serious results from spring colds, which inflame the lungs and develop into pneumonia. Avoid counterfeits by insisting upon having the powerful stuff must be confined to do its deadliest work.
